

EMOTIONAL INTELLIGENCE 360 DEGREE ASSESSMENT

The EQ-i 360 Degree Assessment provides a more in-depth analysis than the EQ-i 2.0 self-assessment. This is because the 360 Degree Assessment engages not only the individual taking the assessment, but also those employees with whom the individual works. From supervisor(s), to peers/fellow team members, to direct reports, the 360 assessment offers the individual a “full spectrum” of perspectives regarding their strengths and areas for improvement, relative to their emotional intelligence and its impact on their leadership effectiveness.
