

LEADERSHIP COACHING EMOTIONAL INTELLIGENCE

Leaders often find they can confide in few people about their own leadership liabilities and other concerns. As coaches certified in Emotional Intelligence Leadership Coaching, we provide a supportive, confidential relationship to help our clients uncover solutions to their leadership dilemmas.

Since the 1990's, emotional intelligence has been recognized as a cornerstone of leadership effectiveness. It is the most influential factor separating "average" leaders from those who most effectively influence and shape their environment.

Where leaders gain perspective!

EQ-i 2.0 EMOTIONAL INTELLIGENCE ASSESSMENT:

We use the EQ-i 2.0 assessment as a foundation for coaching individuals because the assessment takes a "snapshot" of how our client utilizes their emotional intelligence and provides suggested strategies for developing their emotional intelligence further. We then help clients identify for themselves means for significantly improving their leadership effectiveness and commitments to employing these strategies over time.

EQ-i 2.0 360 ASSESSMENT:

The EQ-i 2.0 360 Degree Assessment provides a more in-depth analysis than the EQ-i 2.0 self-assessment. This is because the 360 Degree Assessment engages not only the individual taking the assessment, but also those employees with whom the individual works. From supervisor(s), to peers/fellow team members, to direct reports, the 360 assessment offers the individual a "full spectrum" of perspectives regarding their strengths and areas for improvement, relative to their emotional intelligence and its impact on their leadership effectiveness.

We invite you to explore your coaching needs with us!
